ADD NEW SYMBOL, FIRING POINT			
SUGGESTED CHANGE			
<p>The Fire Support community has a requirement to add a new symbol to MIL-STD-2525B.</p> <ol style="list-style-type: none"> 1. The purpose of the Firing Point symbol is to graphically display firing element (Howitzer) locations to commanders in the Common Operational Picture (COP)/Common Tactical Picture (CTP). 2. Recommend adding to hierarchy item 2.X.4, Fire Support, under the "Point" hierarchy, 2.X.4.1, figure B-17, and table B-IV. 			
<p style="text-align: center;">OVERVIEW</p> <p>Currently, the standard does not contain a symbol depicting Firing Point locations. The purpose of the Firing Point symbol is to graphically display a designated location, to which firing elements (Howitzers) would move to in order to execute a fire mission, to commanders in the COP/CTP. Incorporation into MIL STD 2525B, which will be used in GSD, will allow the symbol to be transmitted/received by all battlefield system. The Firing Point symbol is a required symbol in the COP to be shared across the battlefield. The development of the COP/CTP is required of all ABCS component systems. Fire Support systems are the producer of Firing Points for the COP/CTP. Fire Support systems will retain this capability for fielding throughout the Army and USMC.</p>			
<p style="text-align: center;">OPERATIONAL DESCRIPTION</p> <p>In general, a Firing Point is used to graphically display a designated location from which a firing element would move into to execute a fire mission. One (1) point location is required to graphically display a Firing Point. The minimum information required to interoperate with another is defined below.</p>			
<p style="text-align: center;">IMPLEMENTATION</p> <p>Description: Fire Support, Point, Command and Control, Firing Point</p> <p>Parameters:</p> <ol style="list-style-type: none"> 1.Anchor Points. This graphic requires one anchor point. The point defines the tip of the inverted cone. 2.Size/Shape. Static. 3.Orientation. The graphic will typically be oriented upright, as shown in the example, but will be rotatable. <p>Static/Dynamic: Static</p> <p>Hierarchy: 2.X.4.1.2.3</p> <p>Symbol ID: G*F*PCB---****X</p>

SSMC 3-01: Approved as amended. MIL00-26A Implementation section was amended by removing the words "in 90 degree increments" from paragraph 3 of the parameters and by changing "Fixed/Dynamic: Static" to read "Static/Dynamic: Static". See parameters paragraph above and in the example in Table B-IV of the attachment.			

Attachment A to MIL00-26B, Add New Symbol, Firing Point

Tasks:

1. Modify Figure B-17.1 to reflect the addition of the Firing Point symbol.

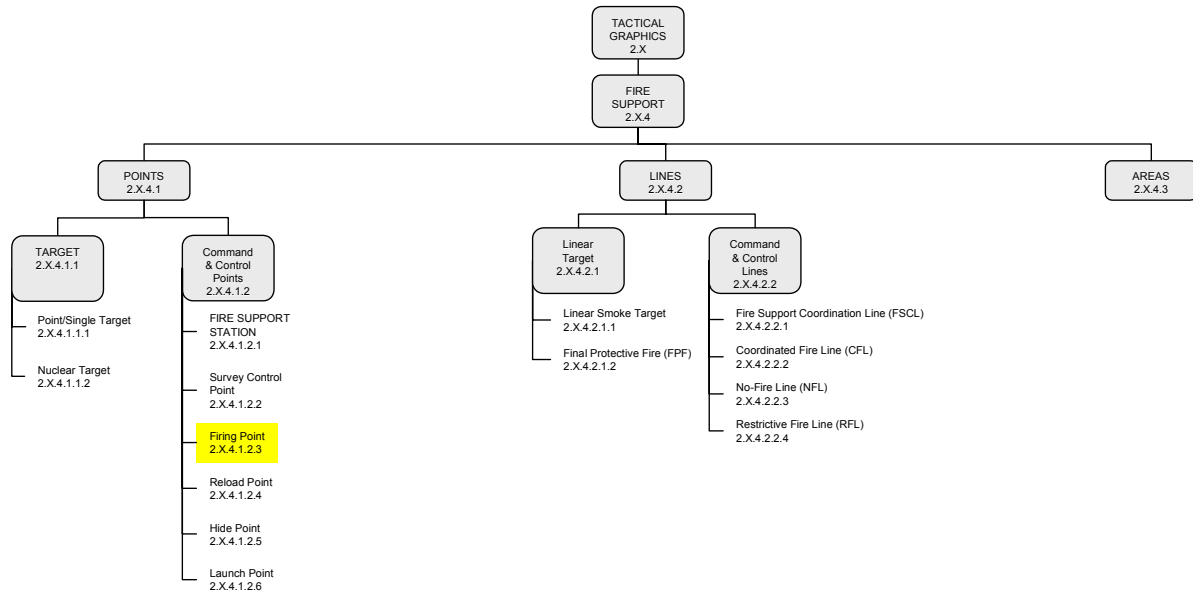

Figure B-17.1. Fire Support.

2. Modify Table B-III to reflect the addition of the Firing Point symbol's hierarchy number and symbol ID.
